12	It was nice to share the answers to students' questions on the discussion board so that other students wouldn't get confused.	
13	I thought the instructors class went very smoothly.	
14	Dr. Qin's support has helped a lot in this class. She understands the amount of time required to complete the coursework as the majority of it is group-project based and has adjusted the deadlines as such. This has helped tremendously and is sincerely appreciated. She was also very timely in responding to questions.

Question:	What did you like the most about the course?
Response Rate:	65.00% (13 of 20)

1	the teamwork collaborations we did	
2	Working with other students on the case studies.	
3	The structure of the assignments	
4	The professor was very quick to answer any questions I had.	
5	The group work	
6	The group work.	
7	The group activities were not as scary as I first thought. The professor was great at making sure we were updated on our grades and feedback was nice.	
8	The final project was interesting and I found the case studies fascinating!	
9	The class was challenging but not overwhelming.	
10	The case studies were interesting sometimes.	

11	I thought the group work was going to be a nightmare, but it ended up being really nice as an online student to connect with other students for the first time in a class.	
12	Getting to know my group members and working with them.	
13	Being able to work in a group while being on online student	

Question: What did you like the least about the course?		
Response Rate: 70.00% (14 of 20)		
1	group work and having to meet with people around everyone's schedule	
2	Yellowdig is not my favorite in courses, but that is okay. I did think it was set up well overall and related to our coursework	
3	The recorded Zoom meetings that needed to be submitted because there was some difficulty getting both the document and video to upload at the same time.	
4	The quizzes	
5	The group project aspect was way too much. The entire course depended on it, which isn't fair to the people who have bad groups or potentially dishonest team members.	
6	Sometimes there were conflicts with meeting times but it worked out.	
7	Nothing specifically	
8	Nothing comes to mind.	
9	N/a	
10	N/A	
11	N/A	
12	I thought the scoring for the Yellowdig posts was a little unfair, as they were solely based on word count and not content. I also wish the peer reviews left space to write about our experiences with out teammates, as the topics on the survey didn't all allow me to express my experience.	
13	I liked everything about this course.	
14	Extra credit opportunities are always great to have for a class, but that is my only suggestion.	

Faculty:		Fei Qin	
Question:		What are the practices and/or behaviors that you would like this instructor to START exhibiting or displaying (things he or she is not currently doing)?	
Response Rate:		65.00% (13 of 20)	
1	n/a		
2	Possibly just go to half the case studies being group activities. Trying to constantly coordinate time to meet was difficult		
3	Nothing specifically, I noticed nothing the professor needed to start doing differently		
4	Nothing comes to mind. She was very responsive to me personally and to changes in the course as well.		
5	N/a		
6	N/A		
7	N/A		
8	Instructor did amazing job teaching.		
9	I would recommend she take another look at her schedule for the semester and correct errors there, I think it created some confusion for some people in the class.		

10	I would like more videos of the content the instructor is trying to teach us.	
11	I wish I knew the class was mostly group work before!	
12	I want Professor Qin to engage with the class more by creating small lectures with readings that go over the ideas she is trying to get us to recognize. I had a hard time understanding what she wanted us to recognize in some readings because the textbook chapters on top of the weekly readings were a lot to take in.	
13	Allow comments on the peer review.	

Faculty:		Fei Qin
Question:		What are the practices and/or behaviors that you would like this instructor to STOP exhibiting or displaying (things he or she should stop doing)?
Response Rate:		55.00% (11 of 20)
1	n/a	
2	There was nothing I thought she should stop doing, I thought she did a really awesome job!	
3	Stop group projects that last for the entire course. I was extremely fortunate to get a decent group, but I felt so bad for those who didn't. Group projects are rarely fair and can cause a lot of stress in people's lives. This is why people take online courses, so they can have flexible schedules. Having a one-week group project part or something like that is fine in the fall or spring, but an entire course in which your grade depends on other people is too much. Imagine if you fail because the others gang up on you or don't do their share. I just think group projects don't work and rarely work out the way they are intended to. Even in the best groups, there is usually one or two people initiating most of the work; I have heard people say this could apply to real life when you have a team project. The difference is in real life; there's always a manager compensated for their leadership; in-class projects, this isn't the case.	
4	Space out the last case study and final presentation.	
5	Nothing comes to mind at the moment.	
6	Nothing comes to mind.	
7	N/a	
8	N/A	
9	N/A	
10	Instructor did amazing teaching.	
11	I also saw nothing the professor needed to stop exhibiting/displaying

Question:		What are the practices and/or behaviors that you would like this instructor to CONTINUE to exhibit or display (things he or she already does)?	
Response Rate:		60.00% (12 of 20)	
1	The professor was supportive to any questions or concerns, all guidelines to assignments and readings were always pretty clear.		
2	I want Professor Qin to keep being kind. This instructor was extremely understanding, responsive, and pleasant. I really appreciated her support throughout the class.		
3	I thought she was very communicative, friendly, and I appreciated the feedback that she offered our teams for each assignment that we submitted. She was very active and engaged with the class.		
4	I really like the layout of the class!		
5	I really appreciated that the Professor was quick to respond to emails whenever I had questions. She also let our group turn in our assignment again when we had difficulty submitting them.		
6	I did like the group work and it better helped me understand the material. It was great to have a set support system rather than waiting for people to respond to a discussion post.		
7	I absolutely loved this class, it was actually one of the classes, in a long time, that I looked forward too, I loved that we had to collaborate with a team. My team was awesome and I enjoyed every second of working with them. I would change nothing about this class, the Instructor was very clear in her messages and taught the curriculum well.		
8	Finding interesting and extra case studies to explore.		
9	Everything else was great		

10	Continue choosing content that helps facilitate learning of the material.	
11	Being very active among students and having great response times.	
12	Being great at teaching.
